Scope of Testing

1. Functional Areas to Cover

- Home Page Load Verification
- Navigation Menu (All links working properly)
- Course Pages (MERN, Testing, etc.)
- Contact Form Submission
- Enquiry / Lead Form
- Buttons & call to action (send email)

O☼◦ **Task Requirements**

◆ **1. Automation Tool**

Use any one:

- Selenium (Java / Python / JS)
- Playwright (Preferred)
- Cypress

◆ **2. Test Scenarios (Must Automate)**

Scenario 1: Homepage Validation

- Verify page loads successfully
- Validate title URL
- Check main sections visibility

Scenario 2: Navigation Testing

- Click all menu items
- Verify correct page redirection

Scenario 3: Training Page Testing

- Open any training page
- Verify training details (title, description, buttons)

Scenario 4: Contact Form Testing

- Enter valid data → send email → success message
- Enter invalid data → validation error

Scenario 5: Button Click Flow

- Click "send Email"
- Verify redirection or form opening

◆ 3. Framework Expectations

- Use Page Object Model (POM)
- Use reusable functions
- Proper folder structure
- Use assertions
- Add waits (explicit preferred)

◆ 4. Deliverables You

must submit:

1. ■Automation Code (GitHub repo)
2. ■Test Case Document (Excel or PDF)
3. ■Bug Report (if any found)
4. ■Execution Video (Screen recording)
5. ■ README file with setup steps

Bug Reporting Format

- Bug ID
- Title
- Steps to Reproduce
- Expected Result
- Actual Result
- Screenshot / Video
- Severity (Low / Medium / High)
